

## Hazardous Waste Disposal

The City of Albany conducts numerous Household Hazardous Waste drop off events each year, which affords City of Albany residents the opportunity to dispose of their hazardous waste in an environmentally responsible way.

Items such as, but not limited to, paint, batteries, antifreeze and boric acids are considered hazardous waste and should never be placed curbside for disposal.

The City of Albany designates several dates each year when residents are able to drop off hazardous materials to the City of Albany Rapp Road Landfill located at 525 Rapp Road.

- Events are held on select evenings throughout the year from 4:00 PM to 7:00 PM.
- This program is available to City of Albany residents only. Pre-registration is required to attend, as there are limited appointments available. **For a full listing of available dates and to pre-register, please call 518-434-2489 or visit [www.albanyrecycles.com](http://www.albanyrecycles.com)**
